Please join me for a Style Event!

Fashion Consultant, Linda Crews offers fashion tips to help create the Best Look For You so that you can buy and wear the clothes and accessories that flatter your body shape and coloring while fitting your lifestyle.

During this style event we will cover:

- **Color Analysis** to determine which colors look best (or worst) on you, based on your hair, skin and eye color
- **Body Shape Analysis** to identify how to wear clothes to accentuate your assets and minimize your challenge areas
- **Guidelines** for accessories, patterns and purses proportional to your frame
- A complete set of **personalized Color Swatches** for your shopping trips
- Other tips such as the best hemlines for your legs and the **16 point Accessory Guideline** as time permits.

Everyone will have the opportunity to leave with their color swatches in hand to take on shopping trips, and a new confidence about what clothes to wear (new or what's in your closet) and how to wear them to get their best look.

What People are Saying

“ Linda is better than a facelift. I got noticed by 2 simple adjustments, and people at work still think I have a whole new wardrobe, but it's the same stuff used in a different way. Linda is the “whole package”. It was about the best fit for MY body type, the best colors, the most flattering hemline, my hair color, and makeup.

~ Isabelle, Executive Office Manager

“ I have always been over weight and struggled with what looked right on me and always stayed more with BLACK – I hated hiding in black, but hoped it was flattering and would fool people to what my real size is. I learned little things can really make a difference.

~ Debi , CFO of a landscape company,
Grandmother

“ Linda's innate sense of style, knowledge of flattering looks, and fitting tips were both encouraging and helpful! Dressing my postpartum figure can be depressing, but I felt equipped after meeting with Linda to shop & find pieces that worked. She walked me through how to use color of clothing to my advantage.
